Superintendent's Report

To the School Board:

I herewith submit my second annual report, it being the ninth in the series of such reports.

The school at Snowville is the only one open this year. Twenty-six pupils are in attendance. Three children attend school in Brownfield, Maine.

This school is well taught by Miss Violet Ward, a graduate of Plymouth Normal School. Two boys who graduated last year are now attending Kennett High School in Conway, making a total of four:

Allan S. Kenneson
Lawrence E. Nelson
Alfred G. Nelson
Seth M. White

As the years pass by, it is increasingly imperative that boys and girls should seek higher education.

Our school nurse, Miss Marjorie Buswell, is carrying on the health inspections again this year. Four of the six towns in this supervisory union had dental clinics last year. It is to be hoped that Eaton may find a way to have one during this year. It is also safe and desirable to have the children given Toxin Anti-toxin treatment to prevent diphtheria.

Parents are urged to consult authorities, including the family physician, and consider having this harm-

less yet effective treatment given to the pupils. Adults and pre-school children may also profit by the treatment. Other towns are taking action. Why should not Eaton do the same?

For the year ending June 30, 1927, our school showed an average attendance of 23, an average membership of 25 and a percent of 95.

Splendid improvements have been made to the school property during the past year. The Snowville building has been painted inside and outside. A heater has been installed and the old broken furniture replaced with single adjustable chairs and desks. A door has been cut through, giving access to the wood shed and toilets. These improvements add much to the attractiveness of the building, making it a real community asset. The heater and new furniture add much to the comfort of the children and hence to their real success. Citizens ought to be proud of this building.

I would urge for the coming year the purchase of the chemical toilets, which could be installed in the shed near the new door. This arrangement would be more sanitary, very convenient in stormy weather, and less exposed to the public.

The roof of the South Eaton School should be covered on one side. This property should not be allowed to suffer decay.

The schools of New Hampshire are making progress. The Normal Schools now offer three and four year curricula, training teachers for the high schools as well as the elementary. It is well, also, that, with intellectual training, emphasis is being put upon char-

acter education. We need citizens of strong noble character.

In good schools we need prompt and regular attendance, good teaching and a full year of unbroken sessions. Let each one boost the school!

Respectfully submitted,

F. W. JACKSON
